## Professional Summary

Full Stack Developer with 1–2 years of hands-on experience building MERN stack (MongoDB, Express.js, React.js, Node.js) applications, including RESTful API development, database schema design, and cloud deployment. Brings a strong analytical foundation (B.Sc. Physics, Chemistry, Mathematics) to structured, logic-driven development work. Oracle Cloud AI Foundations Associate and MERN Stack certified. Seeking an entry-level Full Stack Developer or Software Engineer role to apply full-stack skills in a production environment.

## Projects

### E-Commerce Product Catalog | MERN Stack

- Built a MERN-based product catalog application with full CRUD (Create, Read, Update, Delete) functionality via custom REST API endpoints connected to a MongoDB database.
- Designed a MongoDB schema for product data (name, price, category, stock, description) to support efficient querying and updates.
- Developed multiple reusable React components (product card, product form, listing grid) for a fully responsive UI.
- Version-controlled the full codebase with Git, hosted on GitHub with structured commit history.

### Personal Portfolio Website | Live: [react-portfolio-shree.vercel.app](https://react-portfolio-shree.vercel.app)

- Designed, built, and deployed a live portfolio website using React.js and Vercel, showcasing projects, technical skills, and certifications to recruiters and collaborators.
- Built a REST API endpoint to power the contact form, integrating frontend and backend into a single cohesive app.
- Configured continuous deployment from GitHub to Vercel, so every commit automatically ships to production.
